# Mentor UT for Corrosion

App-based corrosion inspection for today's workplace

 Powerful 32/32 array inspection with conventional UT channel

• Create your own inspection 'Apps' or use pre-installed apps on the device

 Lower training costs with customizable apps and user interface

• Streamline reporting with built-in analysis and data export

• Pair with GE's industry leading dual-element, linear DM probes

GE introduces Mentor UT, the powerful, connected ultrasonic flaw detector optimized for corrosion mapping. Mentor UT brings the power of array inspection to everyday use with an intuitive, touch-screen interface and customizable inspection applications. Increase your inspection productivity through guided, on-device setup and calibration.

#### Now You Have an App for Corrosion

What if corrosion inspection was as easy as using an app on your smartphone? What if you could customize the user interface of your UT instrument for different inspection jobs? Mentor UT combines outstanding UT performance with today's advances in software to create a new kind of inspection experience. Complex inspections are now as easy as following on-screen menus. Use GE-provided on-device apps for corrosion inspection, or create your own using GE's desktop software, Mentor Create.

#### **Lower Training Costs** for New Inspectors

For NDT managers who struggle to maintain a staff of qualified experts, Mentor UT makes it faster and easier to train inspectors to conduct UT inspections. On-screen menus guide inspectors through every step of the inspection, from probe selection and calibration through conducting the inspection and reporting results. The durable, daylight-readable touchscreen makes navigating the device easy and intuitive. Inspection procedures, training documents, pictures and reference guides can all be viewed on the Mentor pictures, videos and reference guides for immediate access during field inspections.

Custom application-specific workflows

**Guided calibration** 

Automatic probe identification

Corrosion scanning made easy

MENTOR

#### **Improve Inspection Productivity**

Mentor UT is more than just cutting-edge software. It combines a powerful 32/32 array flaw detector with a conventional channel, allowing you to instantly switch between PA and conventional inspection.

## Avoid errors in probe selection and calibration with automatic probe ID and guided setup.

Mentor UT has been developed with the quality and precision you've come to expect from GE's DM corrosion probes, and it stands up to tough environments with its IP65 durability rating. Archiving and reporting are easy with the ability to store A-scan data, as well as post-inspection analysis and reporting, on the device.

#### Field-Ready Right Out of the Box

Take the guesswork out of inspection setup with probe kits and inspection apps, already installed on your Mentor UT device.

Mentor UT for Corrosion can be easily partnered with GE's rugged, field-proven DM probes and your preferred commercially available mechanical corrosion scanner.

### Need to create a custom inspection procedure for a specific need?

Mentor Create software allows you to design and customize inspection workflows and custom user interfaces for your unique applications.

#### **Setting the Standard for Connectivity**

Building on the success of the Mentor EM and Mentor Visual iQ products, Mentor UT is the first UT device equipped with wireless connectivity and live streaming. Remote collaboration saves time, simplifies reporting and gives field inspectors the confidence of a second opinion for tough inspection calls.

## **Specifications**

	Physical Phy		
Dimensions (W x H x D)	295 mm x 230 mm x 60 mm (12" x 9.4" x 2.4")		
Weight, w/Battery	2.9 kg (6.5 lbs)		
vveigne, w, buttery	213 1.9 (0.0 100)		
	Display		
Size	264 mm (10.4") diagonal		
Resolution	1024 x 768 pixels		
Mode	Indoor and Outdoor specific color modes		
	± 85° all directions		
Viewing Angle	± 65 dil dil ections		
	Touch Screen (Multi-touch)		
Clayed Operation			
Gloved Operation	Yes		
Surface	Chemically strengthened glass, scratch resistant, chemical resistant, optically bonded to displa		
	Data Storage		
Solid State Hard Drive	16 GB		
USB Storage	USB 2.0 w included module		
Data Capture			
Data Files	Full ASCAN capture for every CSCAN point, all settings. Recall on instrument with full		
	analysis capability.		
Settings Files	All instrument settings plus position in workflow.		
Screen Capture	JPG Format		
Report	PDF Format		
	Connectivity		
Wi-Fi	Yes. 802.11 b, g, n		
Remote Collaboration	Local Network and Internet-Enabled via InspectionWorks Connect		
	Local Network and Internet-Enabled via InspectionWorks Connect  Yes		
Remote Collaboration InspectionWorks Enabled			
InspectionWorks Enabled	Yes I/O		
InspectionWorks Enabled Axes	Yes  I/O  2 digital quadrature encoders for X-Y axes		
InspectionWorks Enabled Axes	Yes I/O		
InspectionWorks Enabled Axes	Yes  I/O  2 digital quadrature encoders for X-Y axes  Tone, 2.7 kHz		
InspectionWorks Enabled  Axes Audible	Yes  I/O  2 digital quadrature encoders for X-Y axes  Tone, 2.7 kHz  Power		
InspectionWorks Enabled  Axes Audible Internal Battery	Yes  I/O  2 digital quadrature encoders for X-Y axes  Tone, 2.7 kHz  Power  63 WH Lithium Ion		
Axes Audible Internal Battery External Battery (included)	Yes  I/O  2 digital quadrature encoders for X-Y axes  Tone, 2.7 kHz  Power  63 WH Lithium Ion  84 WH Lithium Ion		
Axes Audible Internal Battery External Battery (included)	Yes  I/O  2 digital quadrature encoders for X-Y axes  Tone, 2.7 kHz  Power  63 WH Lithium Ion  84 WH Lithium Ion  100 to 240 VAC, 47–63 Hz, 1.9 A		
Axes Audible Internal Battery External Battery (included) Input Battery Life	I/O  2 digital quadrature encoders for X-Y axes Tone, 2.7 kHz  Power  63 WH Lithium Ion 84 WH Lithium Ion 100 to 240 VAC, 47-63 Hz, 1.9 A 3 hrs internal, 6 hrs with included external battery under typical operating conditions		
Axes Audible Internal Battery External Battery (included) Input Battery Life	Yes  I/O  2 digital quadrature encoders for X-Y axes  Tone, 2.7 kHz  Power  63 WH Lithium Ion  84 WH Lithium Ion  100 to 240 VAC, 47–63 Hz, 1.9 A  3 hrs internal, 6 hrs with included external battery under typical operating conditions  Meets IATA air transport regulations with one contained installed battery and one packed		
Axes Audible Internal Battery External Battery (included) Input Battery Life	I/O  2 digital quadrature encoders for X-Y axes Tone, 2.7 kHz  Power  63 WH Lithium Ion 84 WH Lithium Ion 100 to 240 VAC, 47-63 Hz, 1.9 A 3 hrs internal, 6 hrs with included external battery under typical operating conditions

## **Ultrasonic Specifications**

Scanning		
Aperture	1–32 Elements	
Max Elements	32	
Focal Laws	1024	
Scanning	Linear, focused	

Pulser		
Pulse Shape	Bipolar Square Wave	
Voltage	20–150 in 5 V steps	
Width (auto or manual)	50–3000 nS	
Delay Step Increment	10 nS	

Receiver and Digitizer		
Gain	0–78 dB in 0.2 dB steps	
Number of Points	Up to 16	
Slope	50 dB/µS	
Rectification	Pos HW, Neg HW, Full, RF	
System Bandwidth	0.5 MHz to 15 MHz	
PRF	10 Hz to 18 kHz	
Digitizing Rate	62.5 MHz, up-sampled to 500 MHz	
Delay Step Increment	2.5 nS	
Acquisition Range	50 nS to 150 μS	
ASCAN Compression Points	512, 1024, 2048, 4096	
Filters	1, 2, 4, 5, 7.5, 10 MHz, and Broad Band	
Gates	A, B and IF, controlled by gesture or menu parameters	
TOF Modes	J-Flank, Zero Before, Zero After, Peak	
Amplitude Modes	Readings up to 800% FSH – deep dynamic range	
Start Modes	Initial Pulse, IF	
Thickness Resolution	0.05 mm (0.002")
