

# LABQUIP NDT NEWSLETTER

## LABQUIP NDT CELEBRATES A GREAT YEAR!

We are proud to also report strong UK milestone growth with a record-setting 2025, with £2m+ in revenue and building on the 2024 milestone.

Having closed our financial year on 31 May 2025 with £1.7 million in revenue, we are targeting a 50% increase for FY 2026 of £3million, supported by an order book exceeding £900K in open sales orders and many more promising UK opportunities starting into 2026.

Labquip NDT Limited saw out 2025 with exceptional growth figures – and is well on track to achieve a minimum of a 50% increase in year-on-year company sales.

For Labquip NDT Managing Director Conor Cusack, *“these achievements are primarily due to the strength, commitment and expertise of our UK team – and also the excellence of our equipment suppliers – Waygate, Bruker and Labino – to name just a few. Our nationwide presence and central UK facility in Stroud continue to strengthen our service and our operational capacity, and we face 2026 with confidence.”*

## LABQUIP NDT TEAMS UP WITH PEXRAYTECH BATTERY-POWERED X-RAY GENERATOR

Labquip NDT has partnered with Finnish manufacturer Pexraytech in order to bring battery-powered X-ray solutions to the NDT market.

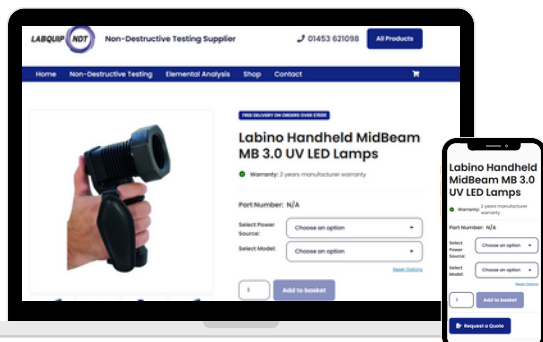

The Pexraytech Gen 160 battery-powered X-ray generator is making waves, reducing the need for isotopes far in excess of expectations, and with no maintenance cost.

The extended battery life can help deliver tens of scans per charge, depending on material thickness, along with the Gen 160's heat management system. The image quality shown from exposures with a 0.9mm focal spot shows clarity and sharpness.

Lauri Westling CEO, Pexraytech with Conor Cusack

## SHOP LABINO ONLINE!

Labquip NDT's web shop is now live with Labino UV lamps, light meters, and accessories available to order online directly by credit card or purchase order (PO).

The new online shop has been a great team effort, and we are glad to make NDT consumables easier and faster for customers to access.

We'll be adding more products over the coming months. If there's an NDT consumable that you would like to see on our web shop next, please just let us know!

# LABQUIP NDT LEADS IN METALS

Labquip NDT enjoyed a very successful outing at the UK Metals Expo, NEC Birmingham in September 2025 – and has rebooked for Metals Expo 2026; doubling the size of stand and positioning the booth on the threshold of the Metals Expo's gateway to the Advanced Engineering show.

Waygate Technologies USM 100 digital flaw detector was in high demand at the metals show. The handheld versatility of the latest version of the instrument is proving very popular across all industrial sectors.

Labquip show visitors included automotive and boat building sectors, also public utilities and process industries in chemicals, oil and gas, food and pharmaceuticals.

## BENCHTOP SPARK OES

The Labquip NDT booth at UK Metals Expo also featured a UK first by showing a version of the Q6 NEWTON - the new benchtop spark OES solution from Bruker.

Matching software for the NEWTON was released last year, and Labquip NDT was one of the first suppliers to demonstrate it to the industry.

## SIMPLE BRIGHTNESS

PRICED AT  
**£390**

Sometimes, the simplest tools make the biggest difference.

The KOWOLUXmini Pocket NDT Film Viewer is small, bright, and perfect for quick inspections on the move. It fits easily in a pocket or kit bag and delivers reliable lighting for film checks wherever you are.

## CHECK THOSE PIPES!

All utilities and process plant businesses should ensure that all pipework and weld lines are thoroughly checked.

Waygate's portable digital USM 100 or cost-effective USM Go is ideal for the job. Prevention is far better than a cure!
